Course Description

This course is designed to provide educators with the foundational knowledge they need to begin using anti-bias education as a means to create socially inclusive environments within their school communities. This course is designed to help teachers navigate areas of social comprehension that are critical to the growth of our students and school communities. You will learn to design curriculum, using the Teaching Tolerance Social Justice Standards, that builds and deepens your student's social awareness and compassion. Participants will have the opportunity to integrate the Social Justice Standards into existing material or use them to create new and innovative educational experiences.

This course will focus on building a learning environment that embodies the goals necessary for teaching social tolerance. You will learn to create a classroom that is free of prejudice and teaches children to celebrate the diversity of those around them. You will learn to design opportunities for your students to recognize and appreciate both their own identities and the identities of their peers. You will learn valuable strategies for exposing your students to the need for social justice and the deep impact their actions can have on the world around them.

Throughout the course you will spend time reflecting on your own views of bias, stereotypes, discrimination and inclusion. Self reflection is a crucial step in our ability to realize the need for anti-bias education and it will inspire you to take innovative steps toward doing so. You will also analyze the actions and steps you and your school community are taking to create inclusive and respectful learning environments. You will leave the course having learned to use the goals of Teaching Tolerance to build upon those actions to solidify a socially responsive culture within your school community.

Objectives

- Identify the fundamental purpose of the social justice standards for anti-bias education.
- Identify the importance of identity, diversity, justice and action in school settings.
- Analyze and apply the social justice anchor standards in the context of a classroom community.
- Reflect on individual connections to the social justice standards.
- Analyze your own identity characteristics, whether or not they are visible or invisible and what category (gender, race, ethnicity, etc.) they fit into.
- Explore how identity is personally developed and socially constructed, as well as how the identity standards impact the students we teach.

- Apply the identity standards to real life scenarios.
- Analyze how the students in your classroom display the identity standards and create a way in which you can use literature to facilitate the growth of your students' understanding of identity.
- Examine what identity looks like in the classroom setting.
- Define diversity and explore its elements: variety (different types of people; people of different races or cultures).
- Compare differences and similarities that exist among people.
- Analyze the diversity standards and how they relate to instructional approaches and/or techniques designed to facilitate the development of the diversity standards.
- Apply the diversity standards to real life scenarios and reflect on how your school community develops, or is working to develop, a diversity mindset.
- Evaluate the use of texts in your classroom and how they facilitate your student's understanding of diversity.
- Apply new texts or instructional strategies to the diversity standards.
- Acknowledge the relationship between justice and bias, stereotype, prejudice, discrimination and privilege.
- Explore the difference between personal stereotypes and systemic discrimination.
- Analyze how privilege impacts discrimination and justice.
- Explore the ways the justice anchor standards might look like in the school setting.
- Identify ways in which using texts can help address the Justice anchor standards.
- Reflect on the ways justice is understood and addressed in the classroom setting.
- Acknowledge personal definitions of 'action' in order to better understand its impact on individual teaching philosophies.
- Explore different ways of understanding, experiencing and taking action.
- Apply the Social Justice Standards in your Classroom

Curriculum Design

This is a sixty-hour, three credit graduate level course completed over a thirteen-week period. Modules One through Nine will be completed one per week. Module Ten will be completed over a two-week period so students will have time to revise and complete the final integration project.

Hardware & Computer Skills Requirements

Computer and Internet access required. Students must have regular access to a computer and be able to use computer skills to successfully complete this course. Many problems instructors and students run into stem from mis-configured browsers, incorrect software

versions, pop-up blockers, and other issues. Most of these issues can be prevented by performing the browser tune up before the course or once a problem arises. Often students find it easier to use *Mozilla Firefox*, *Google Chrome*, or *Safari* rather than Internet Explorer; for some applications Internet *Explorer* may work well.
